Yinan Feng

Sydney, Australia | b2692901@gmail.com | github.com/Marron-lover

Applied AI engineer and University of Sydney undergraduate with experience in multimodal data production, pipeline engineering and medical imaging research.

EDUCATION

The University of Sydney | Expected Dec. 2026

Bachelor of Arts – Computer Science and Digital Cultures

EXPERIENCE

Remote AI Engineering & Data Production

Technical Lead – AI Pipelines & Visual Data | Project work from Apr. 2025

- Image creation and search work spanning **nearly 10 million** images.
- Built aesthetic-image pipelines combining collection, quality filtering, perceptual deduplication and cloud storage.
- Lead a small technical team on AI and data-production projects; direct technical execution while remaining a core hands-on contributor.
- Own workflows from requirements and prompt design through image generation, processing and delivery; develop reusable bilingual prompt systems for posters and design imagery.

Cloudsway Technology

AI Engineering Intern – Multimodal Data Services | Dec. 2025 – Feb. 2026

- Deployed multimodal generation pipelines producing **50,000+** ID photos and images on Alibaba Cloud and Volcengine; managed object storage and remote server infrastructure.
- Built speech-to-text workflows with text normalisation and automated HTML presentation generation.

Reexen

AI Engineering Intern | Sep. 2025 – Nov. 2025

- Prepared and augmented speech datasets for automatic speech recognition; supported model deployment and fine-tuning, contributing to a **15%** reduction in word error rate.

RESEARCH & PROJECTS

PanSegAI – Pancreas Segmentation

Team Lead & Research Initiator – University of Sydney Capstone | 2026

- Improved Dice from **0.762** to **0.777** and HD95 from **36.1** to **13.3** mm in a 56-case CT evaluation.
- Established CT and T2-weighted MRI baselines using nnU-Net v2 and PanSegNet; developed probability-aware Soft Attachment post-processing to reduce false positives.

Travel Reel Studio — AI-Assisted Video Editing

Built a local video-editing workflow connecting AI edit planning with FFmpeg rendering, source-media preservation and verified 1080 × 1920 H.264 exports.

Tradish – AI-Powered Cultural Recipe Discovery

Led React Native app development combining semantic search, computer vision and NLP for recipe discovery and ingredient substitution.

TECHNICAL SKILLS

Python, Java, JavaScript, HTML/CSS, React Native, Node.js, Git, Linux, SSH, PyTorch, TensorFlow, scikit-learn, OpenCV, pandas, NumPy, prompt engineering, Multimodal pipelines, vision-language model evaluation, cloud object storage, dataset QC
